**Q&A: Request for Qualifications – Town Hall Feasibility Study and Conceptual Design**

**Question:**

Under the section “Scope of Services III” in the RFQ, item A.3 requires an historical/archeological review. Is this for potential buried artifacts that might exist or more of a review of historical elements within the buildings? We have worked with an archeologist on sites that have been occupied by Native Americans. Is that the case here in Northborough?

**Answer:**

The Town does not anticipate encountering any buried artifacts during this project. This section is intended to provide a review of historical elements within existing buildings targeted as potential sites for a new Town Hall.
